PROFESSIONAL SUMMARY

Self-driven and motivated individual with a strong passion for technology and problem-solving. Skilled in multiple programming languages and eager to apply technical knowledge in a dynamic professional environment. Excels in team settings and thrives on taking on new challenges.

AREAS OF EXPERTISE

PROFESSIONAL SKILLS

- Leadership and Collaboration
- Effective Communication
- Strong Attention to Detail
- Time Management and Organization
- Problem Solving and Critical Thinking
- Creativity and Innovation in Projects

TECHNICAL SKILLS

- Android Development (Java, XML, Android Studio)
- Machine Learning (Scikit-learn, Pandas, NumPy)
- JSP / Servlets web apps
- Git / GitHub (important for dev roles)
- Proficiency in Java, Python, and JavaScript
- Web Development (HTML, CSS, JavaScript)
- Network Management and Configuration
- Experience with AWS Cloud Computing
- Software Development with Object-Oriented Programming
- Knowledge of Database Management (MySQL)
- Familiarity with IoT and AI Technologies
- Divers License

PROFESSIONAL EXPERIENCE

Price Monitor and Casual Worker, Trade World

Gaborone, Botswana

January 2021 – December 2022

Initially joined as a casual worker providing general assistance in the shop and later took on the role of a price monitor. Ensured accurate and up-to-date pricing on all products as new stock arrived.

- **General Assistance:** Provided support in various shop operations, maintaining a clean and organized environment.
- **Price Monitoring:** Maintained and updated product prices daily to ensure accurate pricing for customers, contributing to efficient inventory management.

Intern, Orange Digital Center – Orange Summer Challenge

Gaborone, Botswana

June 2023 – August 2023

Participated in the Orange Summer Challenge as an intern, focusing on innovative technological projects. Contributed to the HydroEcoBot project, a water filtration system designed to recycle household grey water for reuse in irrigation and other purposes.

- **E-commerce Development:** Developed an e-commerce website for the HydroEcoBot project, enhancing visibility and engagement with the public by showcasing the innovative solution.
- **Web Application Development:** Collaborated in a two-person team to create a web app that monitored activities within the filtration tank, allowing for real-time tracking and maintenance alerts.
- **Innovation and Collaboration:** Worked in a multidisciplinary team to bring a sustainable water filtration solution to life, applying both technical skills and creative thinking.
- Technologies Used: Java, JSP, Servlets, and SQL for database management.

IT Attache at Leeroy Systems

January 2025 – August 2025

- Provided IT support through setup, maintenance, and troubleshooting of end-user devices across the organization.
- Assisted with Microsoft account management, including user setup, access control, and basic administration.
- Supported network management tasks such as device connectivity, basic configuration, and troubleshooting.
- Conducted out-of-office support visits, including resolving system issues at client sites such as WUC.
- Contributed to daily IT operations to ensure system reliability and efficient user support.

Technologies & Tools:

- Windows OS
- Microsoft 365 / Microsoft Accounts
- Active Directory (basic user management)
- Networking (LAN/WAN fundamentals, device setup)
- Hardware troubleshooting (PCs, printers, peripherals)

EDUCATION

Bachelor of Science in Computer Systems Engineering (Ongoing), 2022 - 2026

Institution: Botswana School of Business Sciences

Secondary Education: St. Joseph's College

Botswana General Certificate of Secondary Education (BGCSE), 2021

Achieved 40 points.

Junior Secondary Education: Nare Sereto CJSS

Junior Certificate Examination (JCE), 2019

Achieved Grade B of 50 points.

Primary Education: Pule Memorial School

Primary School Leaving Examination (PSLE), 2016

Achieved Grade A.

CERTIFICATIONS

-Cisco Certified Network Associate (CCNA) _ (Completed)

- AWS Cloud Practitioner Course_ (Ongoing)

UNIVERSITY PROJECTS

HR Management System Development:

Designed and implemented a temporary HR Management System for Trafalgar Tours to manage employee records, allowances, and leave days, addressing key operational challenges. The system streamlined HR processes, reduced manual labor, and improved data accuracy and efficiency during its testing phase.

Warner Bros website

Created a comprehensive plan for designing and developing a website for Warner Bros, focusing on different aspects like website specifications, information design and taxonomy, page template design, technical brief, quality assurance, publishing, promotion, and future recommendations.

The Personal Assistant Management Application (PAMA).

An Android app designed to improve productivity by managing emails, SMS, calls, and web searches. It uses object-oriented programming with various class relationships and has been tested for performance and stability, leading to optimizations for better efficiency and reliability. Quality using tools like Monkey and Lint, resulting in optimizations to enhance efficiency and reliability. Used Android Studio for the development.

Database Design and Development Assignment:

Students are tasked with designing a database for a cinema chain, including creating tables, inserting records, and managing data using SQL and PL/SQL. The assignment involves writing DDL statements, applying constraints, performing data queries, and justifying the use of a DBMS over a file system. It evaluates skills in SQL, PL/SQL, and database management.

Machine Learning Prototype – Pulmonary Fibrosis FVC Prediction

- Developed and evaluated a machine learning model to predict Forced Vital Capacity (FVC) decline in pulmonary fibrosis patients.
- Performed data preprocessing, feature scaling, model training, evaluation, and inference.
- Produced a full evaluation report covering methodology, performance metrics, limitations, and future improvements.
- **Tools & Technologies:** Python, Scikit-learn, Pandas, NumPy, Matplotlib

Android Mobile Application – Fitness / Productivity App

- Designed and developed a functional Android application with user authentication, home dashboard, and categorized features.
- Implemented object-oriented programming principles, activity navigation, and UI layouts.
- Tested application quality using Android tools to ensure performance and stability.
- **Tools & Technologies:** Java, Android Studio, XML, SQLite

Academic Research Project (Proposal & Research Paper)

- Developed a comprehensive **research proposal**, including problem statement, objectives, scope, methodology, and expected outcomes.
- Conducted an in-depth **literature review** to identify research gaps and support the study framework.
- Executed the full **research paper**, covering data collection/analysis, discussion of findings, and conclusions.
- Applied academic research standards, proper citation, and structured technical writing.
- Strengthened skills in analytical thinking, research planning, and professional documentation.

CyberNova Analytics – AI Cybersecurity Web Platform 2026

- Designed and developed a full-stack cybersecurity-focused web application for managing security service requests and analytics.
- Implemented secure authentication systems including password hashing, session management, token validation, token expiry monitoring, and role-based access control.
- Developed admin dashboards featuring analytics, request monitoring, filtering systems, testimonial management, and cybersecurity content management.
- Integrated MySQL database connectivity, secure data handling, and responsive enterprise-style web interfaces.
- Deployed the live web application online using Render hosting services.
- Technologies Used: Java, JSP, Servlets, MySQL, HTML, CSS, JavaScript, Maven, Apache Tomcat.

Authentication & Security Management System 2026

- Developed a secure authentication and authorization system focused on modern cybersecurity practices.
- Implemented secure password encryption using BCrypt hashing techniques.
- Built token generation, validation, revocation, and automatic session expiration functionalities.
- Applied SQL injection prevention, input validation, secure session handling, and audit logging mechanisms.
- Produced technical documentation and evaluation reports covering security architecture and testing procedures.
- Technologies Used: Java, JSP/Servlets, MySQL, Apache Tomcat.

SPARK 2026 – Brain Tumour Segmentation & Medical Imaging AI Research 2026

- Participated in the SPARK 2026 AI research and model development program focusing on medical imaging and brain tumour segmentation.
- Worked with BraTS 2021 MRI datasets involving preprocessing, exploratory data analysis, model preparation, and segmentation workflows.
- Contributed to machine learning experimentation involving nnU-Net frameworks, dataset preparation, evaluation metrics, and volumetric image analysis.
- Performed data preprocessing, dataset validation, visualization, and segmentation analysis using Python-based AI tools.
- Technologies Used: Python, nnU-Net, NumPy, Pandas, Matplotlib, Medical Imaging Datasets.

Product Development & Enterprise Systems Project 2026

- Participated in the design and development of enterprise-focused software solutions as part of Product Development studies.
- Applied software engineering principles including system planning, UML design, database integration, testing, deployment planning, and user-centered design.
- Worked on scalable business-oriented system concepts involving analytics, user management, and responsive web technologies.
- Strengthened project management, collaboration, documentation, and presentation skills throughout the development lifecycle.

HOBBIES & INTERESTS

-Softball Player: Positions -Catcher and First Base

-Choral Singer: Baritone

-Programming Enthusiast: Keen interest in learning new programming languages and technologies.
